About This Game

It's been a few years since the zombpocalypse turned the world's cities into graveyards and sent the few survivors into hiding. Now you must gather them up and restore civilization to a ruined city, one building at a time.

Rebuild 3 is a strategy sim game with a good helping of narrative and dark humor. It's a thoughtful game that'll make you fond of your survivors before you send them to their deaths for the greater good. As you expand your fort to new buildings, you'll decide between farms or fortifications, housing or hospitals, and make tough decisions to fend off raiders, illness, starvation, and madness. And the dead are still out there wandering the streets, hungrier than ever.

Rebuild 3: Gangs of Deadsville is the third of my Rebuild series, and the first one available on Steam. It's a totally new, much bigger game than the first two.

SURVIVOR WANTS TO LEAVE

I got a message from Gustav's group this morning saying Camila Fisher is asking to join up with them. I'm miffed she didn't come to me first with this, but I guess I understand. It's true, things have been going to hell around here, even more so than usual.

It might be good to have one of our guys put in the good word for us with Gustav's group, so we could let her leave with our blessing. On the other hand, we really need her skills here.

→ TALK TO HER (NEED LVL 7 LEADER)

→ BRIBE HER WITH EXTRA FOOD RATIONS

→ LET HER GO

NEXT DAY

ZOMBIE ATTACK!

The Zed just hit our suburb. I knew we should have had someone posted by that wall. No one heard them tearing through our barricades until it was too late.

We lost the suburb.

What a wonderful game :)

To start with this game can be played in rts\/timed mode or turn based
"when ever you feel you want to switch with just a click!

The game is based on random events mostly (this is a good thing for this game ;)
and with you else killing and taking over zombie infested areas.
Building-training-looting-harvesting-finding new survivors and more..

Ps. This game can also be modded easy + notepad friendly
